

**Safeguard your family
from fire**

ALLTIME ALARM - SOLUTIONS LTD

Smoke is a SILENT KILLER

Did you know

Domestic Smoke alarms do not last indefinitely and should be replaced after 10 years as recommended by most manufacturers.

35% of installed smoke detectors may be deemed ineffective due to poor maintenance or incorrect batteries.

A smoke alarm installed in the wrong area or the wrong type of detector **may not give sufficient warning.**

You are twice as likely to die in a fire if you **do not** have a working smoke alarm.

Important! Please read overleaf

Alltime Alarm Solutions Ltd can offer :-

Professional fire alarm installation advice and installers who have years of expertise and experience within the commercial industry which we can adapt to your home environment for optimum safety.

Testing and maintenance of smoke detectors using our special smoke simulation apparatus can assure you that your smoke detector will work in the event of an actual fire.

Friendly and professional advice regarding the positioning of the smoke detectors in your property to maximise their effectiveness in the case of a fire.

New multi sensors that improve response to all types of fires and reduce the possibility of false alarms.

Carbon Monoxide detectors can also be fitted in conjunction with your smoke detectors to provide additional detection.

Specialised systems for the deaf and hard of hearing eg. vibrating pillows and high powered strobes.

Reasonably priced testing and maintenance: **£20 for the first detector and a further £5 per additional detector thereafter within the same property . Replacement mains smoke detectors can be supplied and installed for as little as £40 each and only £25 per battery operated detector (all prices listed are excluding V.A.T.)**
